

Noctua welcomes you at Computex 2008!

This presentation will include:

- NH-U12DX & NH-U9DX Coolers for **Intel Xeon**
- SecuFirm2™ Mounting System for **Socket 1366**
- **NF-S12B** 120mm Fan
- Codename „**Sandwich**“

***In the past 12 months, our products have won more than
300 awards and recommendations from leading
international websites and magazines....***

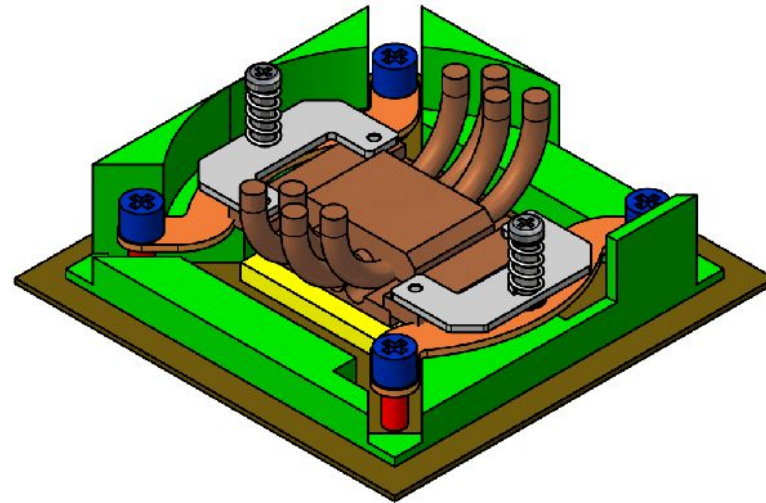

We consider this a great incentive to further improve our products and we'd like to show you some of our upcoming items here at Computex.

SecuFirm2™ for Socket 1366

SecuFirm2™ Mounting System for Socket 1366 (Nehalem/Bloomfield)

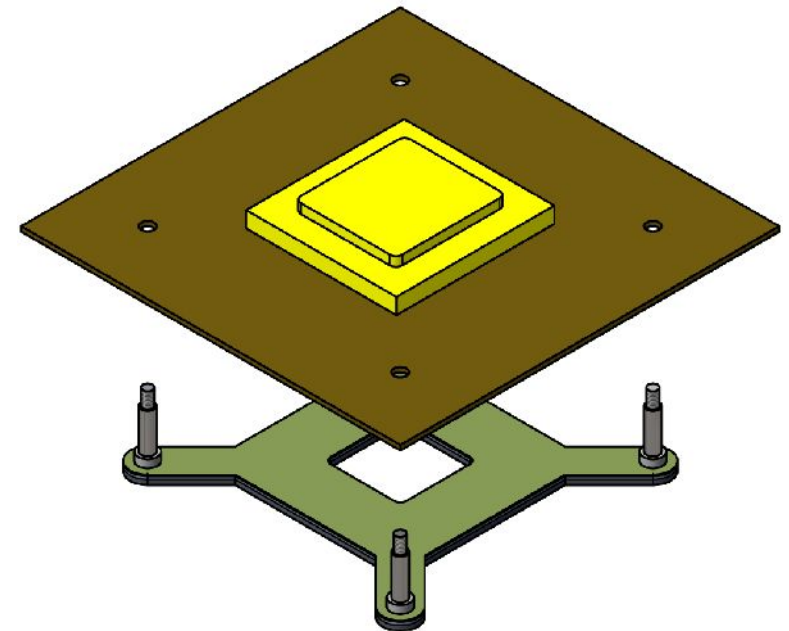

“Fast, convenient & secure: Enthusiast mounting for an enthusiast platform”

Combining Security with Convenience:

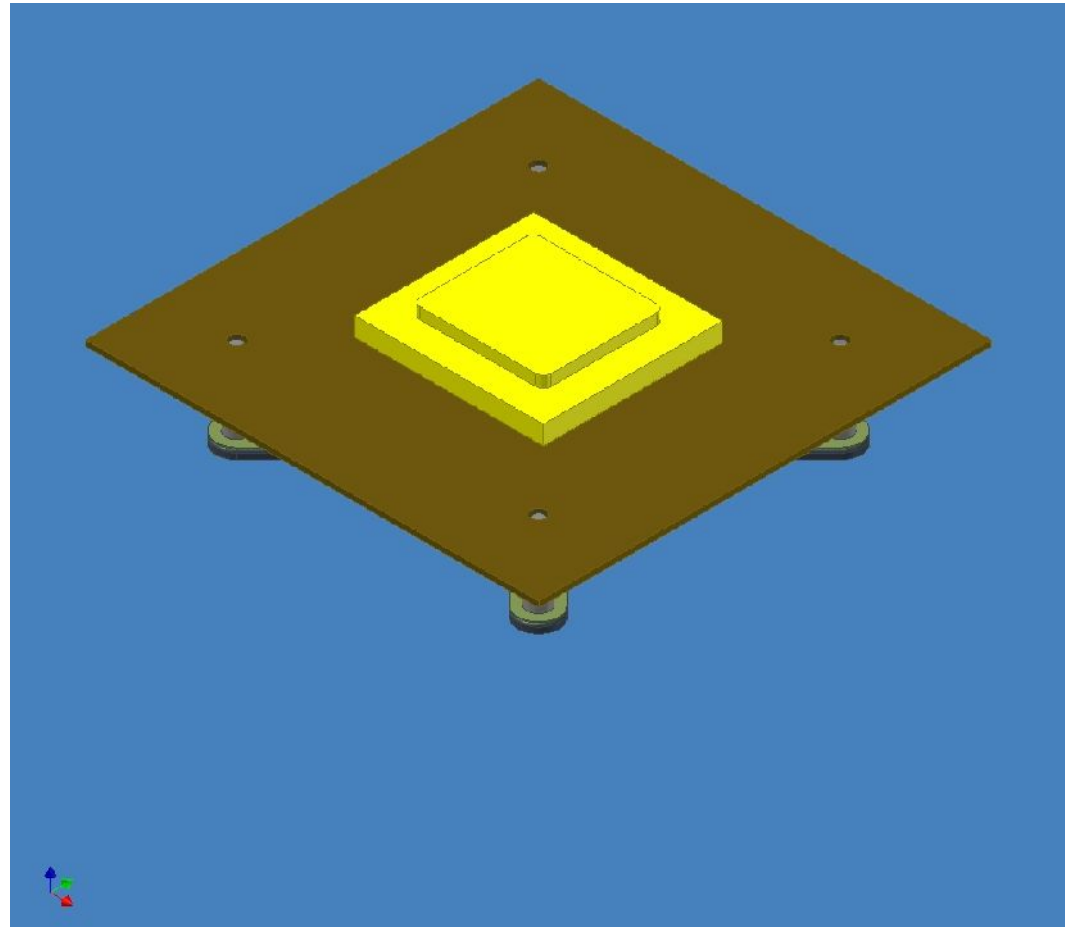

“Customers and testers alike have applauded the reliability of our SecuFirm™ mounting system, but some asked whether we could simplify the installation process without sacrificing security. That’s precisely what we did for the new SecuFirm2™ system!”

- No more washers, no more fiddling with springs and screws
- New one-piece fastening brackets with integrated springs and screws makes it much more convenient to install the cooler inside a case
- Due to the integrated bolts, the backplate can’t shift or fall off during installation

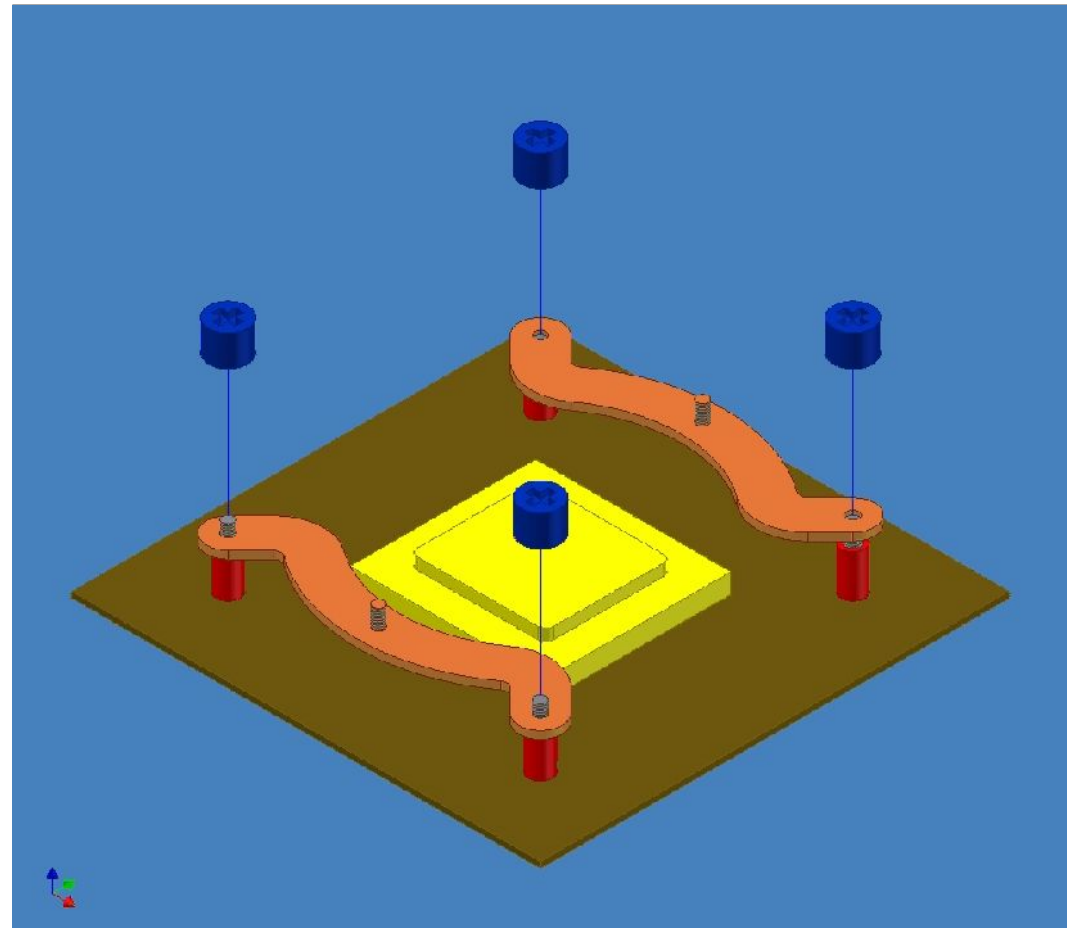

Simplified Installation Process:

- Put the backplate on

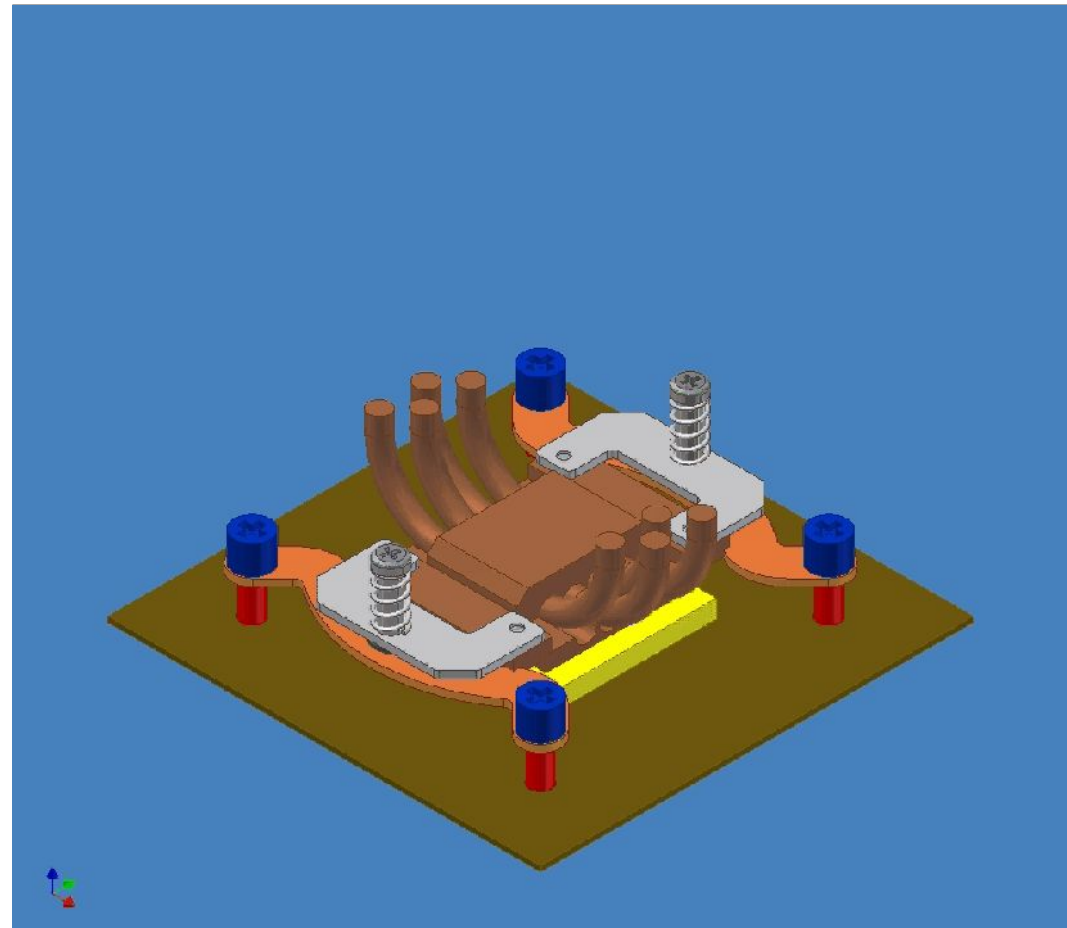

Simplified Installation Process:

- Put the backplate on
- Fix the mounting bars with four thumb-screws

Simplified Installation Process:

- Put the backplate on
- Fix the mounting bars with four thumb-screws
- Fasten the cooler – done!

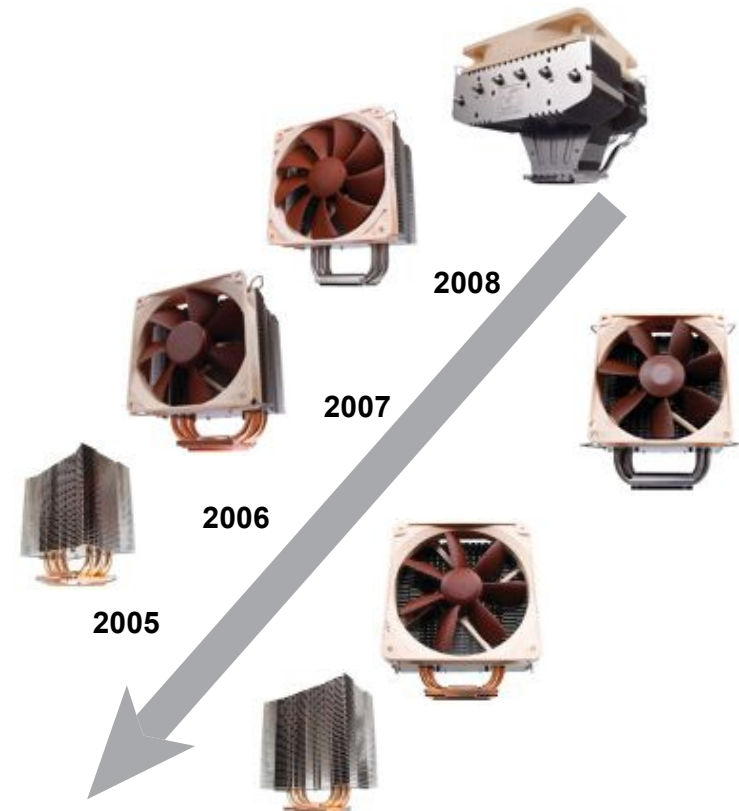

SecuFirm2™ for Socket 1366

Full Backwards Compatibility:

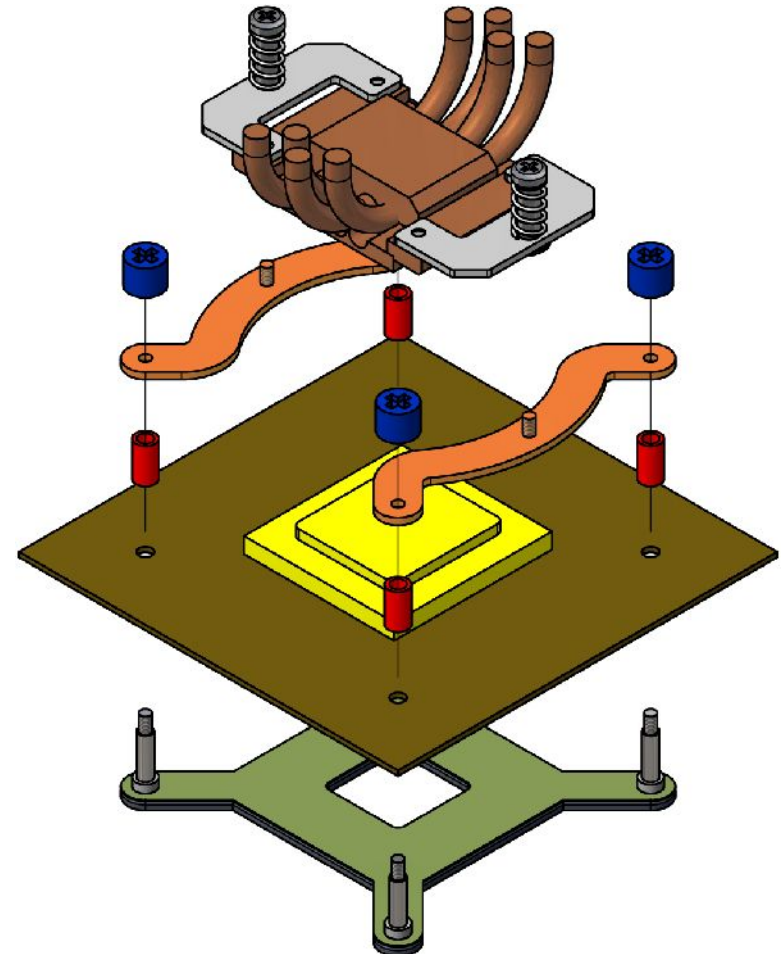

The SecuFirm2™ Mounting System for Socket 1366 can be used with all Noctua coolers since 2005!

- Noctua users will be able to upgrade for free or at a very low service charge (to be determined)
- Noctua coolers are a safe long-term investment: If you choose a Noctua CPU cooler, you'll most likely be able to use it on your next system as well!
- Environmentally friendly: Don't throw the cooler away when you upgrade your rig!

Pricing & Availability

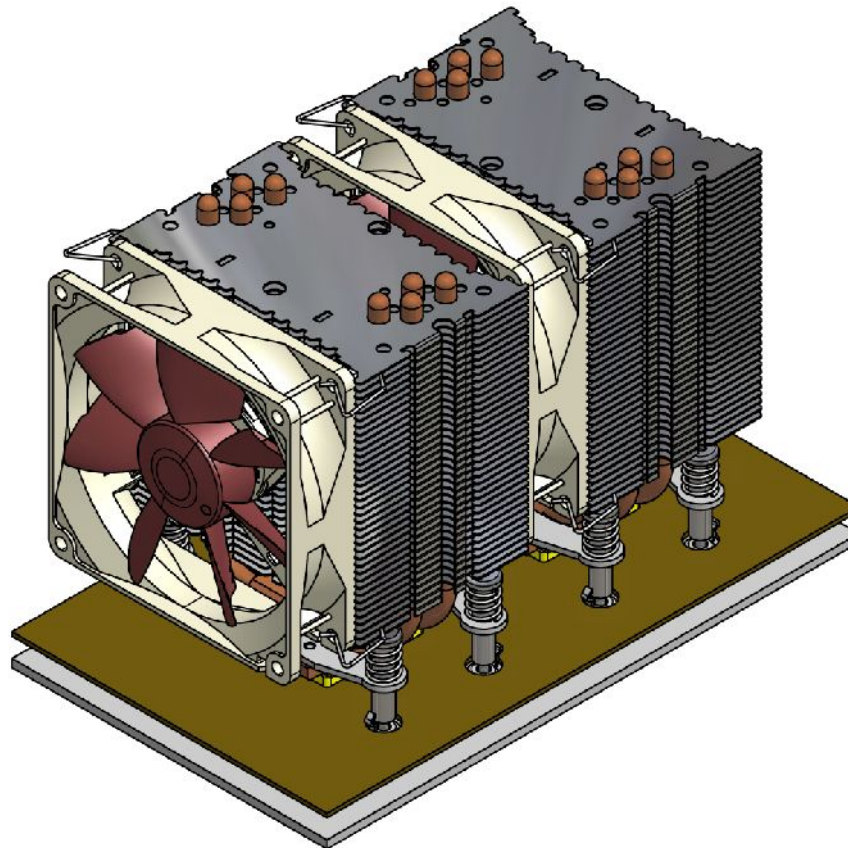

- Estimated availability: Q4 08
- Pricing: To be determined (free or very low service charge for Noctua users)
- Reviewers: Sign up for your 1366 kit now and run your first Bloomfield tests with your Noctua cooler!

NH-U12DX and NH-U9DX

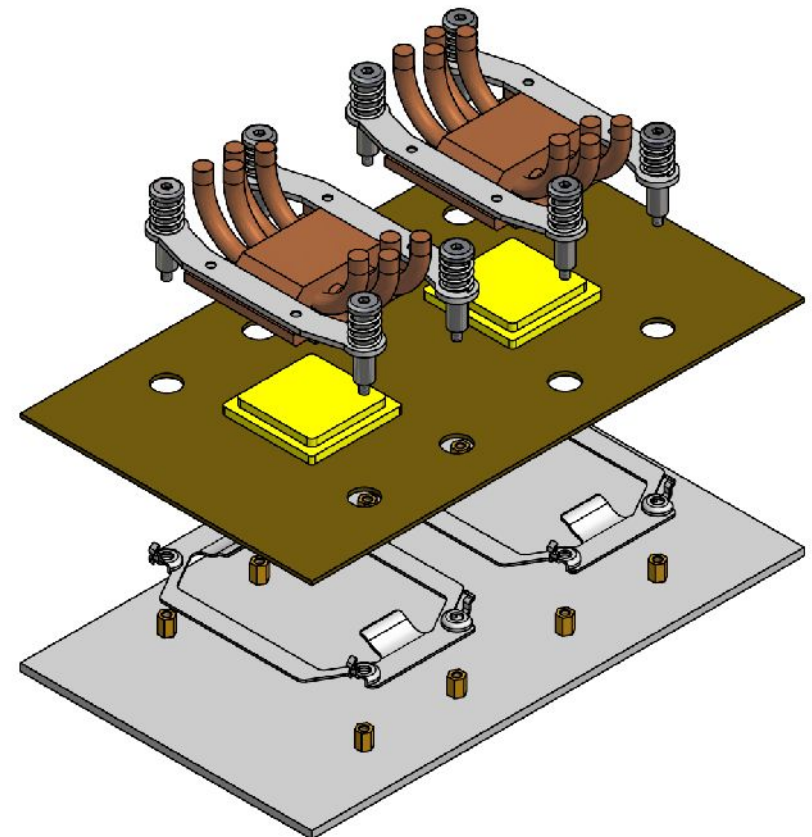

NH-U12DX and NH-U9DX for Dual Xeon

“Silencing your Dual-Xeon systems has never been this easy!”

SecuFirm2™ Mounting for Socket 771

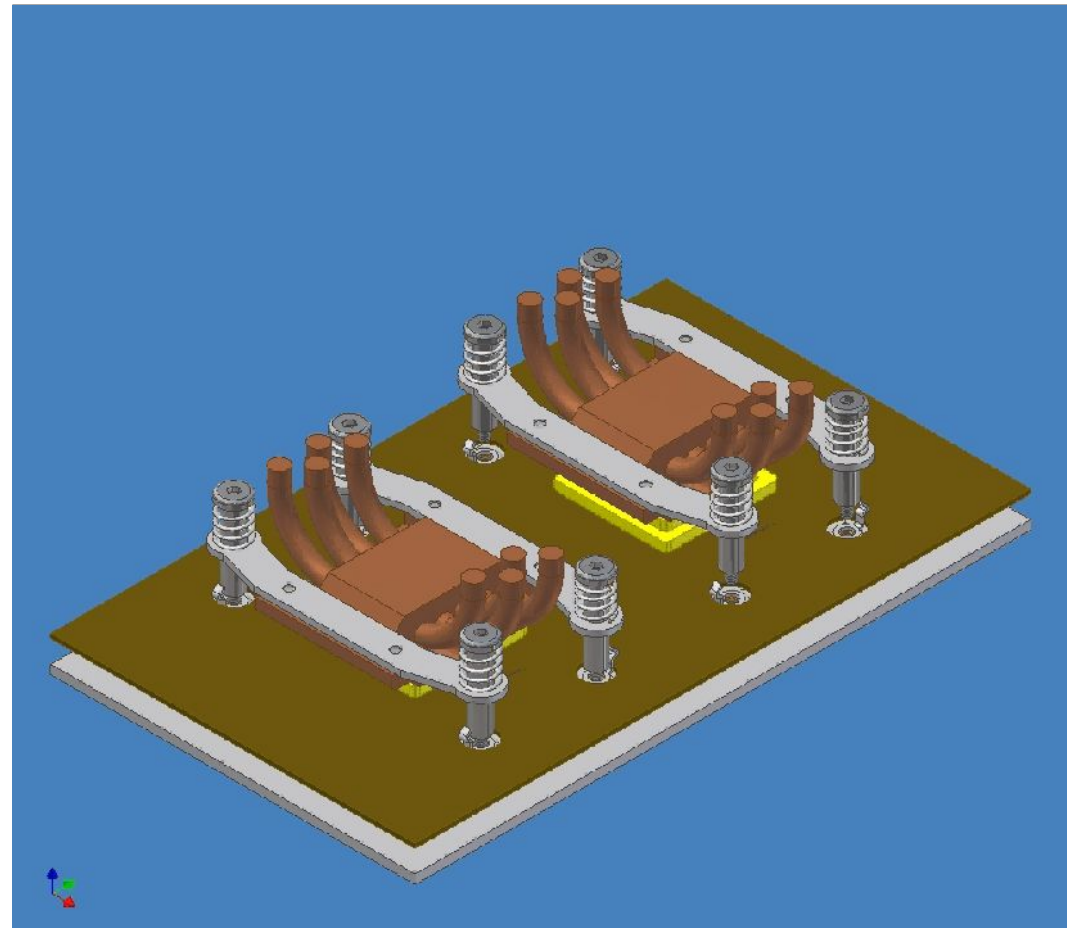

- Bolt-through mechanism fixes the cooler directly to the motherboard tray for maximum stability
- Perfect for SIs where short installation time, maximum convenience and optimal reliability are crucial
- Alternative mounting using a backplate for cases without Xeon mounting holes
- Full compliance with the original Intel mounting system makes the NH-U12DX & NH-U9DX a perfect drop-in replacement for existing setups: Just take the stock coolers off and screw the Noctua coolers on!

NH-U12DX and NH-U9DX

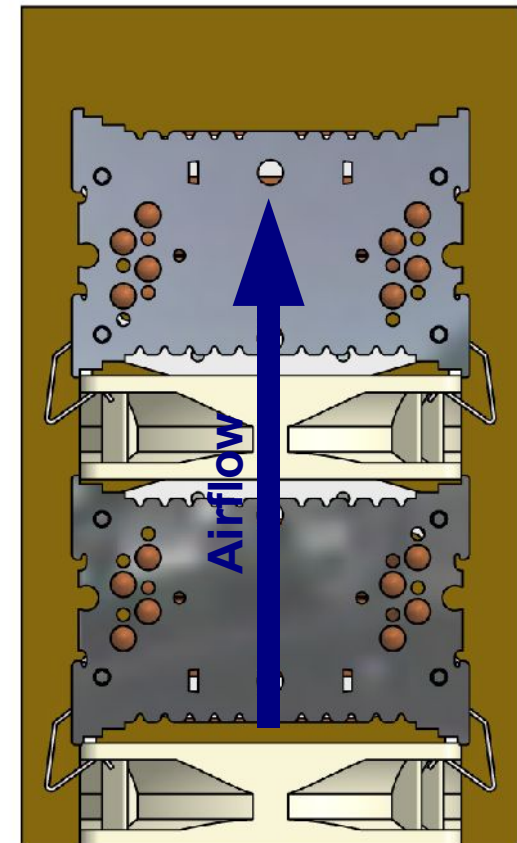

SecuFirm2™ Mounting for Socket 771

- Fast & convenient:
Just fasten 4 spring-loaded
screws and you're done!

Modified asymmetrical fin-shape of NH-U12DX & NH-U9DX Coolers

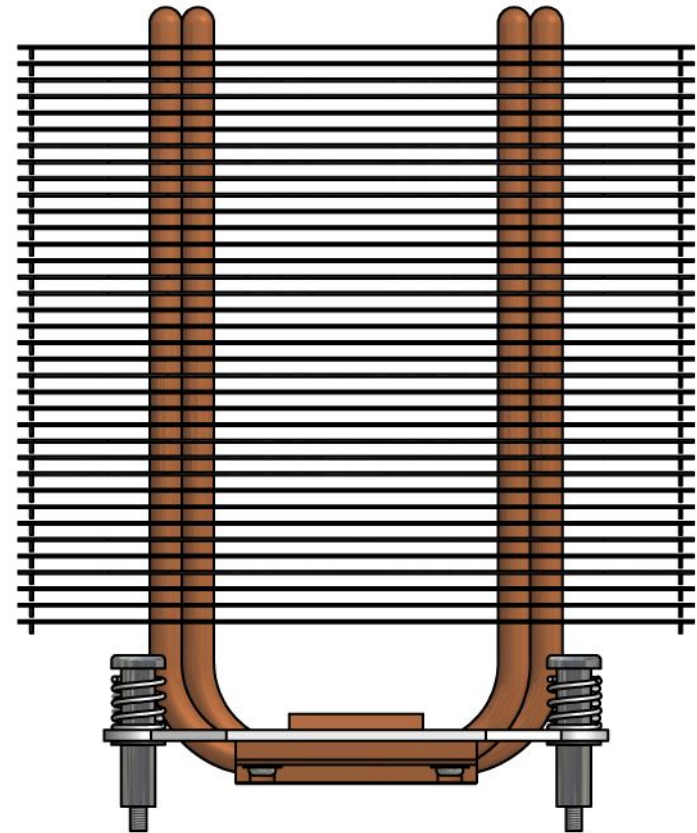

- Tailor-made for Dual Xeon systems
- Two coolers form a wind tunnel on dual socket mainboards
- Proprietary holes for SecuFirm2™ mounting system

NH-U12DX and NH-U9DX

Customized for 4U / 3U chassis

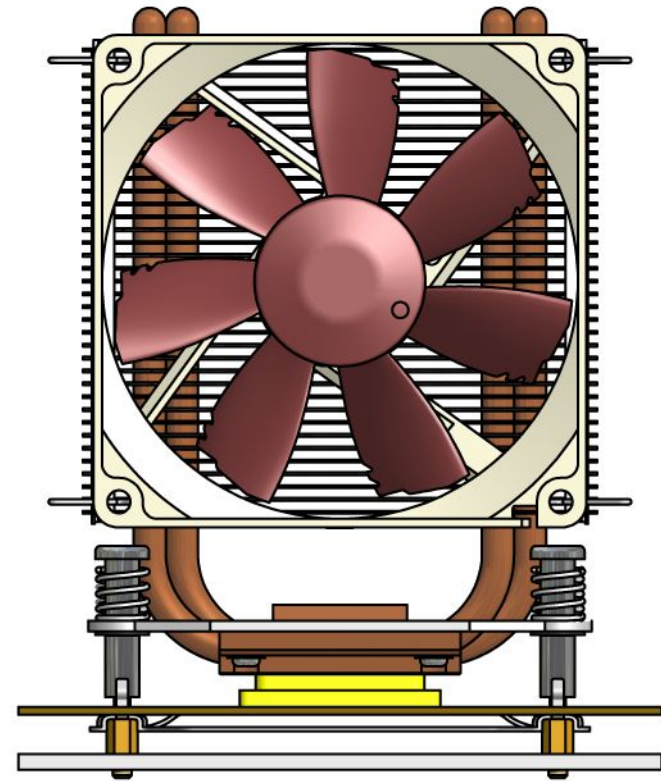

- **NH-U12DX** for 4U chassis:
155x126x65mm, NF-P12 120mm fan
- **NH-U9DX** for 3U chassis: 126x95x65mm,
NF-B9 92mm fan

NH-U12DX and NH-U9DX

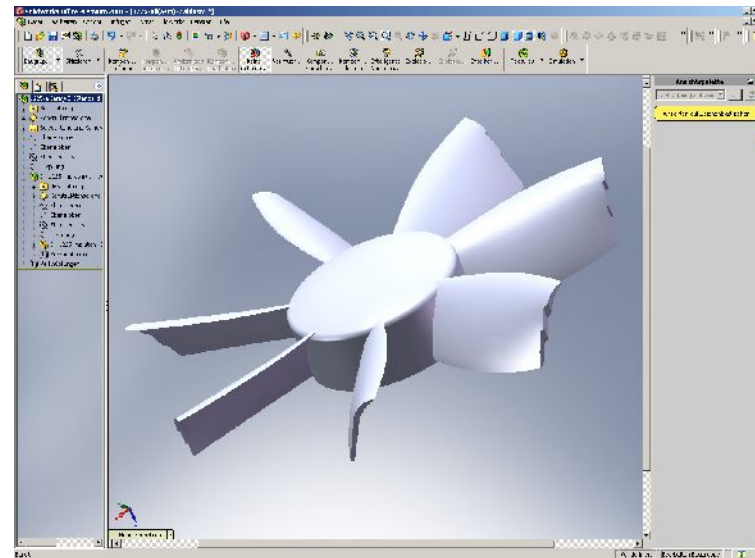

Price & Availability

- Estimated availability: July 2008
- Also to be available for AMD Opteron!
- Customizable bundle for corporate clients
- Pricing on demand

NF-S12B 120mm Fan

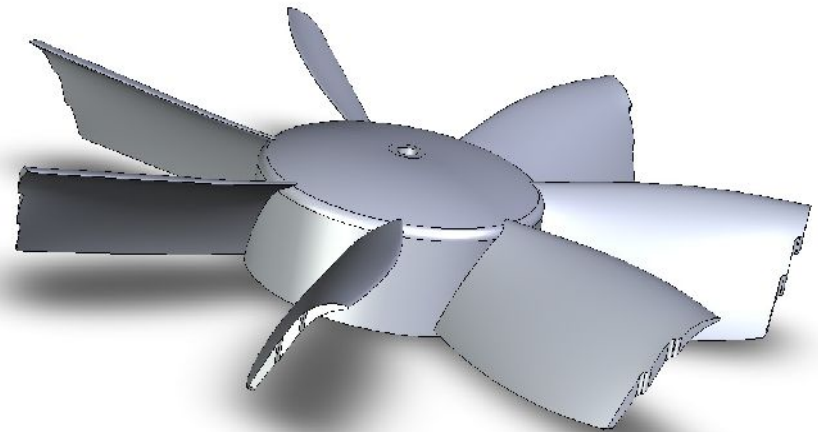

“The last years’ most recommended 120mm fan just got better!”

NF-S12B 120mm Fan

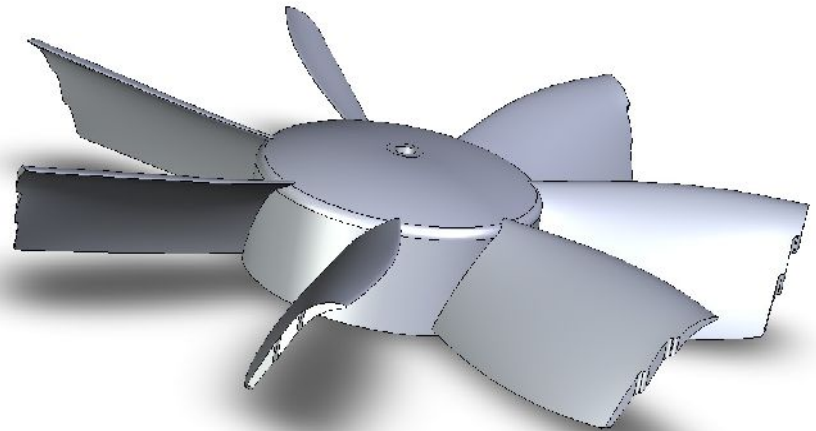

“Since its introduction in late '06, our NF-S12 series has received more than 120 awards and recommendations from leading international websites and magazines. We've worked hard to further improve our signature fan and we're pleased to present you our latest prototype!”

- Refined impeller design with larger diameter and Bevelled Blade Tips
- Smooth Commutation Drive for improved running smoothness
- More airflow and static pressure at the same noise level!

Price & Availability

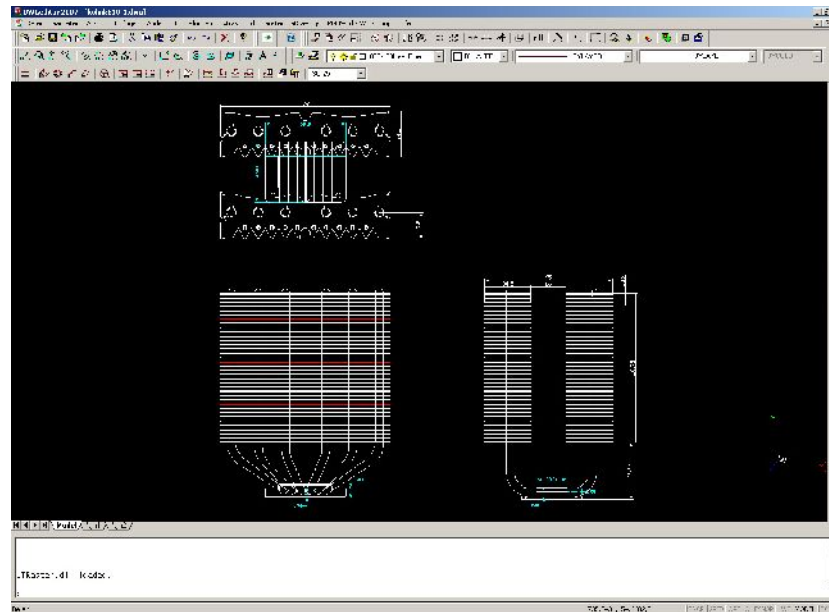

- Estimated Availability: Q4 2008
- Estimated Retail Price: 19.90€ / 22.90 USD

Codename „Sandwich“

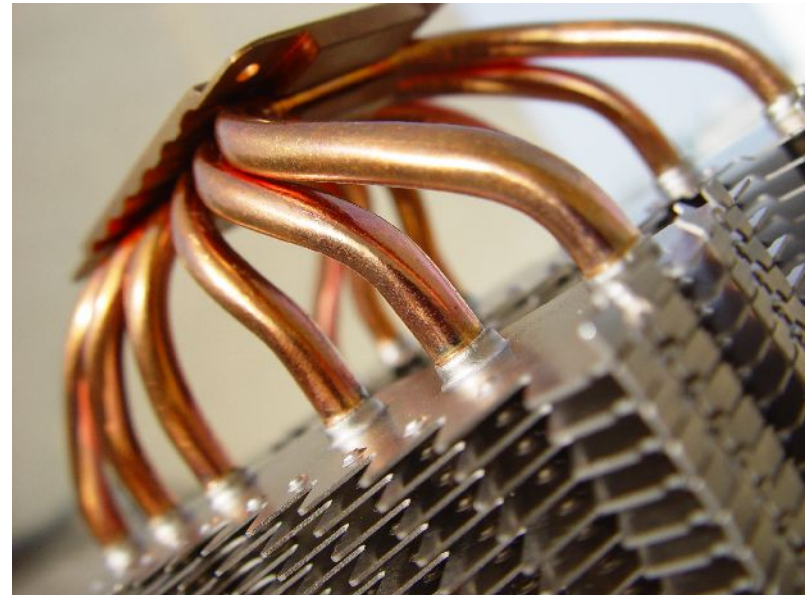

Codename „Sandwich“

“Noctua's next generation flagship cooler!”

Codename „Sandwich“

- Alpha stadium dummy sample (w/o confidential core feature)
- 6 heat-pipe design
- Superior cooling performance
- Socket 1366 (Nehalem/Bloomfield) ready
- Estimated Availability: Q4 2008

Thank you very much for your attention!
